# Subject Index of Volume 140

Actinide compounds
  structural and magnetic properties of tetragonal actinide compounds, 67
Actinide intermetallics
  theoretical studies of actinide intermetallic compounds, 59
Adenosine phosphates
  multinuclear NMR study of coordination of uranyl oxo-cations by adenine nucleotides, 377
Agricultural applications
  new application field for rare earths – agriculture, 351
Americium
  influence of TBP on Am extraction by octyl-(phenyl)-*N,N*-diisobutylcarbamoylmethyl-phosphine oxide, 261
  Redox behaviour of Np in presence of U, P, and Am applied in their separation by TBP and ion exchange (HPLC), 253
  spectrophotometric study of interaction between Am(III) and humic materials, 303

Biochemical behaviour
  biochemical studies of interactions of Pu, Np and Pa with blood and liver cell proteins, 361
  speciation of Pu in biological fluids, 369
  spectroscopic study on binding of Pu(IV) and its chemical analogues to transferrin, 365
Biochemical probes
  lanthanide complexes of Asp-peptides; models for Ca binding sites, 375
Bridging methyl groups
  unusual eight-membered rings with linear symmetric methyl groups from Y and Lu methyl complexes, 15

Capacitors
  role of lanthanides in photonics, electronics and related industries, 335
Catalysis
  behaviour of neodymia as support of highly dispersed Rh, 49
  Ce substituted La perovskites $La_{1-x}Ce_xMO_3$ (M = Co, Fe, Mn) as catalysts for CO + NO reaction, 41
  characterization of lanthanide oxide-promoted Rh alumina catalysts, 45
  industrial applications of rare earths; overview, 339
  lanthanide complexes with different ligands used to catalyze diene polymerizations, 25
  lanthanide derivatives as reagents or catalysts for organic reactions, 3
  non-classical organometallic chemistry and catalysis at actinide centers, 1
  Pd-based diffusion membranes as ethylene hydrogenation catalysts, 53
  production of methanol and light hydrocarbons on $ThO_2$ and doped-$ThO_2$ from CO + $H_2$ mixtures, 39
  progress in coordination polymerization by rare earth catalysts, 7
  reduction of alkenes with organolanthanide complexes/sodium hydride systems, 21
  surface studies of $UFe_2$ and evaluation of its catalytic properties with $2H_2$:CO mixture, 37
Cerium
  measurements on Chernobyl fallout in forest vegetation, 331
  thermodynamics of C dissolved in Fe–Ce, Fe–Y, Fe–Ce–Sb and Fe–Ce–Bi melts, 183
Cerium hydrides
  phase transitions in $CeH_2$–$CeH_3$ system, 89
Cerium oxide
  magnetic studies on $UO_2$–$CeO_2$ solid solutions, 169
Chernobyl accident
  applications of column reversed-phase partition chromatography for determination of actinides in biological and environmental samples, 267
  deposition of Chernobyl fallout in North-east Italy, 327
  measurements on Chernobyl fallout in forest vegetation, 331
Contrast agents
  Gd complexes as contrast agents for liver NMR imaging, 355
Crystal growth
  synthesis and crystallization of pure Yb nitride under high pressure (2000 bar) and temperature (1600 °C), 87
Cyclopentadienyl ligands
  benzylsamarium complexes and their reactivity, 29
  non-classical organometallic chemistry and catalysis at actinide centers, 1
  reduction of alkenes with organolanthanide complexes/sodium hydride systems, 21
  unusual eight-membered rings with linear symmetric methyl groups from Y and Lu methyl complexes, 15

© Elsevier Sequoia/Printed in Switzerland

Decontamination
new materials and techniques for removal of actinides from surfaces, 351
Determination of actinides
applications of column reversed-phase partition chromatography for the determination of actinides in biological and environmental samples, 267
detection of trace amounts of actinides by resonance ionization mass spectrometry, 277
modern methods of separation and determination of radioactive elements, 231
Determination of lanthanides
determination of rare earth elements, U and Th in standard rock GS-N by neutron activation analysis, 285
neutron activation analysis of rare earth elements in Jurassic limestone from central Portugal and its Terra Rossa derivates, 289
studies on β-type binuclear chelates of lanthanides with chlorophosphonazo-mA, 271
and of U and Th in geological samples, 215
Dialkylamides
solvent extraction for chemical separations of 5f elements, 197

Electrochemical analysis
complex formation in Th(IV)–$H_2O$–$CO_2$(g) system, 299
complex formation of trace elements in geochemical systems; stability constants of fluoro complexes of lanthanides in fluorite bearing model system up to 200 °C and 1000 bar, 297
complexation of Pu and Th in aqueous environments, 309
Electron microscopy studies
vacancy ordering in $Y_{18}B_4\square_2Al_6S_{42}$ (B = Al, Sc) compounds by HRTEM, 155
Electronic configurations
divalent Pu; certain properties, 177
Electronic structure
theoretical studies of actinide intermetallic compounds, 59
Enthalpy of formation
of Gd sesquichloride $Gd_2Cl_3$, 107
of ternary lanthanide(II) chlorides; $CsSmCl_3$, $CsTmCl_3$ and $CsYbCl_3$, 109
Environmental samples
applications of column reversed-phase partition chromatography for determination of actinides in biological and environmental samples, 267
detection of trace amounts of actinides by resonance ionization mass spectrometry, 277
spectrophotometric study of interaction between Am(III) and humic materials, 303
ESR studies
ESR and magnetic susceptibility evidence of thermally accessible electron-transferred species in $U_2Cl_{10}[\phi_3As]$, 141
oxidation states of U and Nb in U–Nb–O ternary oxides by means of magnetic susceptibility, XPS and ESR, 133
Europium
$^{57}$Fe Mössbauer studies on $La_{1-x}Eu_xFeO_3$ solid solution system, 105
simultaneous determination of traces of Sm, Eu and Tb through their ternary complexes with 2-thenoyltrifluoroacetone and diphenylguanidine in presence of Triton X-100, 273
Europium telluride
preparation and stoichiometry of EuTe–SrTe solid solution, 119

Fiber optics
industrial applications of rare earths in fiber optics, luminescent solar concentrators and lasers, 345

Gadolinium
Gd complexes as contrast agents for liver NMR imaging, 355
static high pressure studies on lanthanides Gd and Nd to one megabar pressure, 117
Gadolinium halides
borderline of cluster chemistry with lanthanides, 57
Gadolinium sesquichloride
enthalpy of formation of Gd sesquichloride $Gd_2Cl_3$, 107
Geochemical processes
complex formation in Th(IV)–$H_2O$–$CO_2$(g) system, 299
complex formation of trace elements in geochemical systems; stability constants of fluoro complexes of lanthanides in fluorite bearing model system up to 200 °C and 1000 bar, 297
complexation of Pu and Th in aqueous environments, 309
interactions between Th and humic compounds in surface waters, 315
retention of La(III) and Nd(III) by montmorillonite, 307
U and lanthanide speciation by thermal lensing spectrophotometry, 293
Geological samples
determination of lanthanides and of U and Th in geological samples, 215
determination of rare earth elements, U and Th in standard rock GS-N by neutron activation analysis, 285
neutron activation analysis of rare earth elements in Jurassic limestone from central Portugal and its Terra Rossa derivates, 289
Glass/ceramics
industrial applications of rare earths; overview, 339

High pressure studies
high pressure X-ray absorption spectroscopy on U compounds, 193
static high pressure studies on lanthanides Gd and Nd to one megabar pressure, 117
High $T_c$ superconductors
$La_{2-x}Sr_xCuO_4$ and $YBa_2Cu_3O_{6.5}$; new high $T_c$ superconducting oxides, 167
Holmium
$^{166}Ho$; potential lanthanide element in radiotherapy, 359
Humic acids
interactions between Th and humic compounds in surface waters, 315
spectrophotometric study of interaction between Am(III) and humic materials, 303
Hydrazine derivatives
kinetics and mechanism of Np and Pu reactions with organic derivatives of hydrazine, 31
Hydrogenation catalysts
reduction of alkenes with organolanthanide complexes/sodium hydride systems, 21

Industrial applications
of rare earths in fiber optics luminescent solar concentrators and lasers, 345
of rare earths; overview, 339
role of lanthanides in photonics, electronics and related industries, 335
Instrumental neutron activation analysis
determination of lanthanides and of U and Th in geological samples, 215
determination of rare earth elements, U and Th in standard rock GS-N by neutron activation analysis, 285
of rare earth elements in Jurassic limestone from central Portugal and its Terra Rossa derivatives, 289
Ion exchange separation
Redox behaviour of Np in presence of U, Pu, and Am applied in their separation by TBP and ion exchange (HPLC), 253

Kinetic studies
kinetics and mechanism of Np and Pu reactions with organic derivatives of hydrazine, 31

Lanthanide chlorides
enthalpies of formation of ternary lanthanide(II) chlorides; $CsSmCl_3$, $CsTmCl_3$ and $CsYbCl_3$, 109
Lanthanide clusters
borderline of cluster chemistry with lanthanides, 57
Lanthanide fluorocomplexes
complex formation of trace elements in geochemical systems; stability constants of fluoro complexes of lanthanides in fluorite bearing model system up to 200 °C and 1000 bar, 297
Lanthanide oxide(s)
characterization of lanthanide oxide-promoted Rh alumina catalysts, 45
electron beam impact; new route to unusual stoichiometry and rare earth intermediate oxides, 79
Lanthanide oxychalcogenides
crystal chemistry and layered structural description of oxychalcogenides involving f-transition elements, 161
Lanthanide pyrochlores
preparation and X-ray powder diffraction study of pyrochlores $CdLn(TiSb)O_7$ (Ln = Nd, Gd, Yb) and $Na_{0.5}Ln_{1.5}(TiSb)O_7$ (Ln = Nd, Sm, Gd, Dy, Yb), 145
Lanthanide sulfides
thermodynamics of lanthanide elements in presence of S in Fe–base metallic solutions, 187
Lanthanum
deposition of Chernobyl fallout in North-east Italy, 327
$La_{2-x}Sr_xCuO_4$ and $YBa_2Cu_3O_{6.5}$; new high $T_c$ superconducting oxides, 167
measurements on Chernobyl fallout in forest vegetation, 331
retention of La(III) and Nd(III) by montmorillonite, 307
U–Ca–La–O and U–La–O systems; comparative study, 159
Lanthanum aluminate
thermodynamic properties of lanthanum aluminate $LaAlO_3$, 181
Lanthanum orthoferrite
$^{57}Fe$ Mössbauer studies on $La_{1-x}Eu_xFeO_3$ solid solution system, 105
Lanthanum orthovanadates
crystal chemistry of solid solutions $Ca_{1-x}Ba_x$-$LaTh(VO_4)_3$, 165
Lanthanum oxides
non-stoichiometric aspects and physical properties of $La_2NiO_4$ oxide, 151
preparation and characterization of $La_2Li_{0.5}Al_{0.5}$-$O_4$ with $K_2NiF_4$ structure, 147
Lanthanum perovskites
Ce substituted La perovskites $La_{1-x}Ce_xMO_3$ (M = Co, Fe, Mn) as catalysts for CO + NO reaction, 41
Lasers
industrial applications of rare earths in fiber optics, luminescent solar concentrators and lasers, 345
role of lanthanides in photonics, electronics and related industries, 335
Luminescence studies
luminescence and X-ray studies of $LuTa_{1-x}Nb_x$-$O_4$ system, 97

Lutetium
unusual eight-membered rings with linear symmetric methyl groups from Y and Lu methyl complexes, 15
Lutetium niobate
luminescence and X-ray studies of $LuTa_{1-x}Nb_xO_4$ system, 97
Lutetium tomtalate
luminescence and X-ray studies of $LuTa_{1-x}Nb_xO_4$ system, 97

Magnetic properties
effects of neutron irradiation on magnetic properties of UP, 173
magnetic studies on $UO_2$—$CeO_2$ solid solutions, 169
Mössbauer studies on oxo-neptunates; comparison between hexavalent and tetravalent Np, 101
of pentavalent U ternary oxides with fluorite structure; $ScUO_4$, $YUO_4$, $CaU_2O_6$ and $CdU_2O_6$, 137
structural and magnetic properties
of intermetallic compound $NpMn_2Ge_2$, 83
of tetragonal actinide compounds, 67
synthesis, crystal structure and magnetic properties of new ternary U chalcogenides; $RuUS_3$ and $RhUS_3$, 93
Mass spectrometry
detection of trace amounts of actinides by resonance ionization mass spectrometry, 277
determination of lanthanides and of U and Th in geological samples, 215
Mass transfer studies
of Nd, U, Np and Pu across liquid–liquid interfaces, 265
Metallurgy
industrial applications of rare earths; overview, 339
Mineralogical analysis
neutron activation analysis of rare earth elements in Jurassic limestone from central Portugal and its Terra Rossa derivates, 289
Montmorillonite
retention of La(III) and Nd(III) by montmorillonite, 307
Mössbauer studies
$^{57}Fe$ Mössbauer studies on $La_{1-x}Eu_xFeO_3$ solid solution system, 105
on oxo-neptunates; comparison between hexavalent and tetravalent Np, 101
structural and magnetic properties of intermetallic compound $NpMn_2Ge_2$, 83

Neodymium
analysis of Tm and Nd mixtures by using photometric derivative graphical model, 249
determination of Nd with 1-(2-pyridylazo-2-naphthol in micelles of Triton X-100 by derivative spectrophotometry, 245
mass transfer studies of Nd, U, Np and Pu across liquid–liquid interfaces, 265
retention of La(III) and Nd(III) by montmorillonite, 307
static high pressure studies on lanthanides Gd and Nd to one megabar pressure, 117
Neodymium chloride
action of Na on $NdCl_3$ and $PrCl_3$; mixed valence $NaNdCl_6$ and metallic $NaPr_2Cl_6$, 113
Neodymium oxide
behaviour of neodymia as support of highly dispersed Rh, 49
Neptunium
biochemical studies of interactions of Pu, Np and Pa with blood and liver cell proteins, 361
kinetics and mechanism of Np and Pu reactions with organic derivatives of hydrazine, 31
mass transfer studies of Nd, U, Np and Pu across liquid–liquid interfaces, 265
Mössbauer studies on oxo-neptunates; comparison between hexavalent and tetravalent Np, 101
Redox behaviour of Np in presence of U, Pu, and Am applied in their separation by TBP and ion exchange (HPLC), 253
Neptunium carboxylates
spectrophotometric analysis of complexes of $NpO_2^+$ in solution; complexes with anions of oxalic, malonic, succinic and maleic acid, 243
Neptunium intermetallics
structural and magnetic properties of intermetallic compound $NpMn_2Ge_2$, 83
Neutron irradiation effects
on magnetic properties of UP, 173
NMR imaging
Gd complexes as contrast agents for liver NMR imaging, 355
NMR studies
lanthanide complexes of Asp-peptides; models for Ca binding sites, 375
multinuclear NMR study of coordination of uranyl oxo-cations by adenine nucleotides, 377
NMR shifts induced by lanthanide cations as aid to phenyl $^1H$ resonance assignments, 373
unusual eight-membered rings with linear symmetric methyl groups from Y and Lu methyl complexes, 15
Nuclear fuel reprocessing
solvent extraction for chemical separations of 5f elements, 197

Organic synthesis
lanthanide derivatives as reagents or catalysts for organic reactions, 3
Organometallics
benzylsamarium complexes and their reactivity, 29
non-classical organometallic chemistry and catalysis at actinide centers, 1

reduction of alkenes with organolanthanide complexes/sodium hydride systems, 21
unusual eight-membered rings with linear symmetric methyl groups from Y and Lu methyl complexes, 15
Organophosphorus extractants
5f and 4f ion complexes with dibutylphosphate ions, 257
influence of TBP on Am extraction by octyl-(phenyl)-*N,N*-diisobutylcarbamoylmethylphosphine oxide, 261
mass transfer studies of Nd, U, Np and Pu across liquid–liquid interfaces, 265
Redox behaviour of Np in presence of U, Pu, and Am applied in their separation by TBP and ion exchange (HPLC), 253
solvent extraction for chemical separations of 5f elements, 197
Orthovanadates
crystal chemistry of solid solutions $Ca_{1-x}Ba_x$-$LaTh(VO_4)_3$, 165
Oxo-neptunates
Mössbauer studies on oxo-neptunates; comparison between hexavalent and tetravalent Np, 101
Oxychalcogenides
crystal chemistry and layered structural description of oxychalcogenides involving f-transition elements, 161

Palladium hydrogenation catalysts
Pd-based diffusion membranes as ethylene hydrogenation catalysts, 53
Partition chromatography
applications of column reversed-phase partition chromatography for determination of actinides in biological and environmental samples, 267
Peptides
lanthanide complexes for Asp-peptides; models for Ca binding sites, 375
NMR shifts induced by lanthanide cations as aid to phenyl $^1H$ resonance assignments, 373
Phase transformations
static high pressure studies on lanthanides Gd and Nd to one megabar pressure, 117
Phase transition studies
luminescence and X-ray studies of $LuTa_{1-x}Nb_xO_4$ system, 97
phase transitions in $CeH_2$–$CeH_3$ system, 89
preparation and stoichiometry of EuTe–SrTe solid solution, 119
preparation of ThN by thermal decomposition of $Th_3N_4$, 123
study of U–Zr–O ternary system, 127
synthesis and crystallization of pure Yb nitride under high pressure (2000 bar) and temperature (1600 °C), 87
U–Ca–La–O and U–La–O systems; comparative study, 159
Photoelectron spectroscopic studies
Ce substituted La perovskites $La_{1-x}Ce_xMO_3$ (M = Co, Fe, Mn) as catalysts for CO + NO reaction, 41
oxidation states of U and Nb in U—Nb–O ternary oxides by means of magnetic susceptibility, XPS and ESR, 133
production of methanol and light hydrocarbons on $ThO_2$ and doped-$ThO_2$ from CO + $H_2$ mixtures, 39
surface studies of $UFe_2$ and evaluation of its catalytic properties with $2H_2$:CO mixture, 37
UPS study of $O_2$, $CO_2$, CO and $C_2H_4$ adsorption on U, 35
Plutonium
analysis of Pu containing materials by gamma spectrometry, 283
biochemical studies of interactions of Pu, Np and Pa with blood and liver cell proteins, 361
complexation of Pu and Th in aqueous environments, 309
divalent Pu; certain properties, 177
kinetics and mechanism of Np and Pu reactions with organic derivatives of hydrazine, 31
mass transfer studies of Nd, U, Np and Pu across liquid–liquid interfaces, 265
Redox behaviour of Np in presence of U, P, and Am applied in their separation by TBP and ion exchange (HPLC), 253
speciation of Pu in biological fluids, 369
spectroscopic study on binding of Pu(IV) and its chemical analogues to transferrin, 365
Plutonium carbonates
solubility of $PuO_2(CO_3)$, 239
Plutonium recovery
incineration method for Pu recovery from alpha-contaminated organic compounds, 279
Polymerization catalysts
lanthanide complexes with different ligands used to catalyze diene polymerizations, 25
progress in coordination polymerization by rare earth catalysts, 7
Praseodymium chloride
action of Na on $NdCl_3$ and $PrCl_3$; mixed valence $NaNd_2Cl_6$ and metallic $NaPr_2Cl_6$, 113
Protactinium
biochemical studies of interactions of Pu, Np and Pa with blood and liver cell proteins, 361
Pyrochlores
preparation and X-ray powder diffraction study of pyrochlores $CdLn(TiSb)O_7$ (Ln = Nd, Gd, Yb) and $Na_{0.5}Ln_{1.5}(TiSb)O_7$ (Ln = Nd, Sm, Gd, Dy, Yb), 145

Radioactive wastes
complexation of Pu and Th in aqueous environments, 309

interactions between Th and humic compounds in surface waters, 315
retention of La(III) and Nd(III) by montmorillonite, 307
Radiometric analysis
analysis of Pu containing materials by gamma spectrometry, 283
determination of isotopic and total Th at ultra-trace level in water by α-spectroscopy and micro-injection ICP–AES, 321
interactions between Th and humic compounds in surface waters, 315
modern methods of separation and determination of radioactive elements, 231
Rhodium alumina catalysts
characterization of lanthanide oxide-promoted Rh alumina catalysts, 45

Samarium
benzylsamarium complexes and their reactivity, 29
simultaneous determination of traces of Sm, Eu and Tb through their ternary complexes with 2-thenoyltrifluoroacetone and diphenylguanidine in presence of Triton X-100, 273
Separation of actinides
application of column reversed-phase partition chromatography for determination of actinides in biological and environmental samples, 267
modern methods of separation and determination of radioactive elements, 231
solvent extraction for chemical separations of 5f elements, 197
Separation of actinides and lanthanides
5f and 4f ion complexes with dibutylphosphate ions, 257
recent advances and actual status of actinides and lanthanides research at IPEN–CNEN/São Paulo, Brazil, 207
Shift reagents
NMR shifts induced by lanthanide cations as aid to phenyl $^{1}H$ resonance assignments, 373
Solar concentrators
industrial applications of rare earths in fiber optics, luminescent solar concentrators and lasers, 345
Solid solutions
magnetic studies on $UO_2$–$CeO_2$ solid solutions, 169
preparation and stoichiometry of EuTe–SrTe solid solution, 119
Solubility
of $PuO_2(CO_3)$, 239
Solvent extraction
for chemical separations of 5f elements, 197
determination of isotopic and total Th at ultra-trace level in water by α-spectroscopy and micro-injection ICP–AES, 321
5f and 4f ion complexes with dibutylphosphate ions, 257
influence of TBP on Am extraction by octyl-(phenyl)-*N,N*-diisobutylcarbamoylmethylphosphine oxide, 261
mass transfer studies of Nd, U, Np and Pu across liquid–liquid interfaces, 265
recent advances and actual status of actinides and lanthanides research at IPEN–CNEN/São Paulo, Brazil, 207
Speciation
of Pu in biological fluids, 369
U and lanthanide speciation by thermal lensing spectrophotometry, 293
Spectrophotometric analysis
analysis of Tm and Nd mixtures by using photometric derivative graphical model, 249
of complexes of $NpO_2^+$ in solution; complexes with anions of oxalic, malonic, succinic and maleic acid, 243
determination of Nd with 1-(2-pyridylazo)-2-naphthol in micelles of Triton X-100 by derivative spectrophotometry, 245
Redox behaviour of Np in presence of U, Pu, and Am applied in their separation by TBP and ion exchange (HPLC), 253
simultaneous determination of traces of Sm, Eu and Tb through their ternary complexes with 2-thenoyltrifluoroacetone and diphenylguanidine in presence of Triton X-100, 273
spectrophotometric study of interaction between Am(III) and humic materials, 303
spectroscopic study on binding of Pu(IV) and its chemical analogue to transferrin, 365
studies on β-type binuclear chelates of lanthanides with chlorophosphonazo-mA, 271
Structural chemistry
crystal chemistry and layered structural description of oxychalcogenides involving f-transition elements, 161
Synoviotherapy
$^{166}Ho$; potential lanthanide element in radiotherapy, 359
Synthesis gas
production of methanol and light hydrocarbons on $ThO_2$ and doped-$ThO_2$ from $CO + H_2$ mixtures, 39
surface studies of $UFe_2$ and evaluation of its catalytic properties with $2H_2$:CO mixture, 37

Terbium
simultaneous determination of traces of Sm, Eu and Tb through their ternary complexes with 2-thenoyltrifluoroacetone and diphenylguanidine in presence of Triton X-100, 273
Theoretical studies
of actinide intermetallic compounds, 59

Thermal lensing spectrometry
U and lanthanide speciation by thermal lensing spectrophotometry, 293
Thermodynamic studies
of C dissolved in Fe–Ce, Fe–Y, Fe–Ce–Sb and Fe–Ce–Bi melts, 183
enthalpy of formation
of Gd sesquichloride $Gd_2Cl_3$, 107
of ternary lanthanide(II) chlorides; $CsSmCl_3$, $CsTmCl_3$ and $CsYbCl_3$, 109
of lanthanide elements in presence of S in Fe–base metallic solutions, 187
and phase equilibria in order to predict behavior of Y in iron and steel, 189
thermodynamic properties of lanthanum aluminate $LaAlO_3$, 181
unusual eight-membered rings with linear symmetric methyl groups with Y and Lu methyl complexes, 15
Thorium
complex formation in Th(IV)–$H_2O$–$CO_2$(g) system, 299
complexation of Pu and Th in aqueous environments, 309
determination
of isotopic and total Th at ultra-trace level in water by α-spectroscopy and micro-injection ICP–AES, 321
of lanthanides and of U and Th in geological samples, 215
of rare earth elements, U and Th in standard rock GS-N by neutron activation analysis, 285
interactions between Th and humic compounds in surface waters, 315
non-classical organometallic chemistry and catalysis at actinide centers, 1
speciation of Pu in biological fluids, 369
Thorium nitride
preparation of ThN by thermal decomposition of $Th_3N_4$, 123
Thorium orthovanadates
crystal chemistry of solid solutions $Ca_{1-x}Ba_x$-$LaTh(VO_4)_3$, 165
Thorium oxide
production of methanol and light hydrocarbons on $ThO_2$ and doped-$ThO_2$ from $CO + H_2$ mixtures, 39
Thulium
analysis of Tm and Nd mixtures by using photometric derivative graphical model, 249
Transferrin
spectroscopic study on binding of Pu(IV) and its chemical analogues to transferrin, 365

Uranium
determination
of lanthanides and of U and Th in geological samples, 215
of rare earth elements, U and Th in standard rock GS-N by neutron activation analysis, 285
high pressure X-ray absorption spectroscopy on U compounds, 193
mass transfer studies of Nd, U, Np and Pu across liquid–liquid interfaces, 265
non-classical organometallic chemistry and catalysis at actinide centers, 1
Redox behaviour of Np in presence of U, Pu, and Am applied in their separation by TBP and ion exchange (HPLC), 253
U and lanthanide speciation by thermal lensing spectrophotometry, 293
UPS study of $O_2$, $CO_2$, CO and $C_2H_4$ adsorption on U, 35
Uranium–calcium–oxygen system
U–Ca–La–O and U–La–O systems; comparative study, 159
Uranium chalcogenides
synthesis, crystal structure and magnetic properties of new ternary U chalcogenides; $RuUS_3$ and $RhUS_3$, 93
Uranium chloride
ESR and magnetic susceptibility evidence of thermally accessible electron-transferred species in $U_2Cl_{10}[\phi_3As]$, 141
Uranium intermetallics
surface studies of $UFe_2$ and evaluation of its catalytic properties with $2H_2$:CO mixture, 37
Uranium niobates
oxidation states of U and Nb in U–Nb–O ternary oxides by means of magnetic susceptibility, XPS and ESR, 133
Uranium oxide
magnetic studies on $UO_2$–$CeO_2$ solid solutions, 169
Uranium phosphide
effects of neutron irradiation on magnetic properties of UP, 173
Uranium ternary oxides
magnetic properties of pentavalent U ternary oxides with fluorite structure; $ScUO_4$, $YUO_4$, $CaU_2O_6$ and $CdU_2O_6$, 137
Uranium–zirconium–oxygen system
study of U–Zr–O ternary system, 127
Uranyl adenosine phosphates
multinuclear NMR study of coordination of uranyl oxo-cations by adenine nucleotides, 377

X-ray absorption studies
high pressure X-ray absorption spectroscopy on U compounds, 193
X-ray diffraction studies
action of Na on $NdCl_3$ and $PrCl_3$; mixed valence $NaNd_2Cl_6$ and metallic $NaPr_2Cl_6$, 113
crystal chemistry of solid solutions $Ca_{1-x}Ba_x$-$LaTh(VO_4)_3$, 165

luminescence and X-ray studies of $LuTa_{1-x}Nb_xO_4$ system, 97
non-stoichiometric aspects and physical properties of $La_2NiO_4$ oxide, 151
preparation and characterization of $La_2Li_{0.5}Al_{0.5}O_4$ with $K_2NiF_4$ structure, 147
preparation and X-ray powder diffraction study of pyrochlores $CdLn(TiSb)O_7$ (Ln = Nd, Gb, Yb) and $Na_{0.5}Ln_{1.5}(TiSb)O_7$ (Ln = Nd, Sm, Gd, Dy, Yb), 145
synthesis, crystal structure and magnetic properties of new ternary U chalcogenides; $RuUS_3$ and $RhUS_3$, 93

Ytterbium nitride
synthesis and crystallization of pure Yb nitride under high pressure (2000 bar) and temperature (1600 °C), 87

Yttrium
$La_{2-x}Sr_xCuO_4$ and $YBa_2Cu_3O_{6.5}$; new high $T_c$ superconducting oxides, 167
Pd-based diffusion membranes as ethylene hydrogenation catalysts, 53
study of thermodynamics and phase equilibria in order to predict behavior of Y in iron and steel, 189
unusual eight-membered rings with linear symmetric methyl groups from Y and Lu methyl complexes, 15

Yttrium sulfides
vacancy ordering in $Y_{18}B_4\square_2Al_6S_{42}$ (B = Al, Sc) compounds by HRTEM, 155
